## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Perry et al (6,328,021).

Perry discloses an evaporative emission control and leak detection system for a motor vehicle, the system in fluid communication with emissions from a fuel tank (12), an engine and a carbon canister (18), the system comprising: an integrated valve module (20) connected to the carbon canister (18) and in fluid communication with the atmosphere, and arranged to vent the system when exposed to predetermined high negative and positive pressure conditions, and a predetermined low negative pressure condition, the module including a switch (58) operable to indicate when the system is in a high or low negative pressure condition, see figures 1 and 2, and columns 3 and 4. With regard to claim 10, the carbon canister (18) is coupled to the integrity module.

### ***Allowable Subject Matter***

3. Claims 2-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**Conclusion**

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show relief valves.
